This is an index to the titles and sponsors of the individual issues of the Bulletin. The index is divided into three parts:

1. A listing in sequential order.
3. A listing by sponsor.

I prepared this index in the course of writing a paper on the Bulletin in History 893G, Historical Method. That class was taught by Mr. Fite. Users should keep in mind that I did not prepare the index for publication and that I did not intend to make it a definitive, scholarly product. I have been asked to release it by several officials at the University, and I am happy to do so. I hope that it will be useful to others interested in the history of the University.

I used the FAMULUS Personal Information System to prepare the listings which appear in this index. FAMULUS is a software package which allows the user to create and edit computer files and to search those files or to produce various listings from them. FAMULUS is described well in a "Software Review" in Computers and the Humanities 10:233-234. 1976. The version of FAMULUS available here is not as sophisticated as the one described in the review. I am preparing a manual for FAMULUS users at the University of Georgia.

The Pacific Forest and Range Experiment Station of the US Forest Service provided FAMULUS to the University at no charge. The Political Science Department at the University has generously supported my work with FAMULUS. The department obtained FAMULUS from the Forest Service and has paid for the computer services I have used to operate it. I appreciate the support Dr. Frank Thompson, the department head, and Dr. John Alford, former Director of the Political Data Analysis Center, have given me.
PART I
The Sequential Listing

This listing is arranged according to what I felt the proper order for the issues should be. Where bound volumes were available (Volumes 1 through 70, with gaps), I accepted the order imposed on the material by the person who assembled the issues for binding. I organized the remaining issues as if I were assembling them for binding. I arbitrarily assigned the publication dates which I would put on each volume. I grouped the issues in the volumes on the basis of the dates which appear on them and on the basis of their design and format. Since recent issues were not assigned volume and serial numbers, I have no way of knowing if I have identified all of the issues of the Bulletin published recently.

Each entry in the listing is made up of several fields. Only the year and title fields were required—the title was not required where issue is listed only to note that it is missing. Other fields were used as needed. The fields appear in this order in this listing.

1. Academic Year (or Years) of Publication.
2. Volume and Number.
3. Sponsoring Organization.
4. Title.
5. Series Notation.
7. Notes.

The number which appears before each entry in the listing was assigned by the computer.
1. 1900-1901. VOL. 1 NO. 1. FALL NUMBER.
