It has been accepted for inclusion in The NEBLINE Newsletter Archive from UNL Extension in Lancaster County by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.
**Garbology for 2nd Grade**

The Garbology 4-H School Enrichment program is part of the science curriculum for Lincoln Public Schools second-graders. Many other Lancaster County schools teach it as well. The lessons and experiments are based on science concepts (scientific inquiry, prediction, observation, discussion and conclusion).

Garbology was originally developed in the early 1990s by several local organizations, including UNL Extension in Lancaster County. In 2002, Extension revised it with the help of the City of Lincoln Recycling Department and Lincoln Public Schools to meet the Nebraska and National Learning Standards of Excellence.

Last year, several updates were made:
- Teachers guides were updated with current information.
- Each EPS school was given eleven new different student book titles and three new different DVDs.
- The eight largest EPS schools were given an additional nine book titles and one additional DVD.
- Eight additional papermaking kits were created for schools to check out as needed.

**Trash to Treasure for Afterschool K–5**

Extension developed Trash to Treasure in 2007 for elementary afterschool programs. A few middle school afterschool programs also participate. Activities are divided into different grade levels, Kindergarten through fifth grade. The teachers guide also includes ideas for field trips and service-learning projects.

Dan Payant, director of the afterschool program at Irving Recreation Center, says, "Students particularly enjoy the hands-on activities, especially the optional paper-making component. Having kits available from Lancaster County Extension is a real benefit to our youth programs. We save time and other resources when we are able to rely on this kind of quality, professionally developed 4-H curriculum."

**Students do hands-on science experiments such as making miniature landfills to compare how quickly different materials decompose. Second graders observe, discuss, record and make conclusions.**

**In the papermaking activity, students make their own paper from previously-used paper.**

**Students de hands-on science experiments such as making miniature landfills to compare how quickly different materials decompose. Second graders observe, discuss, record and make conclusions.**

**In the papermaking activity, students make their own paper from previously-used paper.**

Baking is a Fun Way for Families to Spend Time Together

Lisa Franzhen-Castle, RD, PhD
UNL Nutrition Specialist

Baking is an inexpensive family activity that provides opportunities for families to share baking traditions, recipes and family heritage that can be handed down through each generation. February is Bake for Family Fun Month and the Home Baking Association (www.homebaking.org/familyfun) encourages families to spend time together in the kitchen. Below are some tips on how to get started.

Baking tips from the Home Baking Association:
1. Do some prep work. Prep by reading and trying the recipe first. Add 20 to 30 minutes to explain, show and guide beginners and 15 minutes for intermediates or experienced bakers. Divide it into two sessions, if needed, or pre-measure or prepare some steps beforehand.
2. Keep it clean. Remember to wash hands and countertops before starting and cleaning up after you’re done. Provide separate towels for hands and dishes and frequently wash pot holders. Aprons or large T-shirts are great for keeping clothes clean during the baking process.
3. Take it one step at a time. Read the recipe, gather ingredients and make sure nothing was left out. When short on time, or working with beginning or young bakers, prepare some steps ahead or do some steps one day and complete the mixing or baking the next.
4. Use the right tools. Pour liquids (water, oil, milk, honey, corn syrup) in a clear liquid measuring cup placed on the countertop. Read amount at eye level. Use standard dry measures for dry ingredients (flours, sugar, cocoa, brown sugar, conmeal). Use measuring spoons for small amounts less than 1/4 cup (4 tablespoons).
5. Do a safe kitchen checklist. Turn handles of pans toward the center of the stove so skews or people passing by won’t catch on them and spill. Keep cupboard doors and drawers closed unless in use. Always use only dry hot pads or oven mitts because heat goes through damp mitts. When stirring or checking for doneness, tilt the lid away from you so steam is released away from your face.
6. Oven ins and outs. Before preheating, make sure the oven racks are in the right place for the pans and recipe. Preheat the oven as the recipe directs — allow 10 minutes. Place pans in the oven so they do not touch each other or the oven sides. Do not place pans on racks directly below or above another pan. Keep clean, dry oven mitts or pads close by.

Baking can be a learning experience. Children and adults learn a lot together in the kitchen. The results of cooking or baking together contributes to stronger relationships at home and in groups and children learn time management, team skills, following directions and problem solving.

PUDDING FACES

As a fun way to encourage younger children to include milk in meals, serve “pudding faces” for dessert or snacks. Make with a favorite flavor of instant pudding and fat-free milk. Let children decorate their own pudding face using such add-ons as raisins, grapes, apple wedges, almonds, orange slices, blueberries, craisins, chocolate chips and bananas.

MEXICAN SKILLET RICE

(6 servings)
1 pound lean ground beef or turkey
1 medium onion, chopped
2 tablespoons chili powder
1 teaspoon ground cumin
2 4-ounce cans diced green chilies (optional)
3 cups cooked brown rice
1 medium fresh tomato, seeded and chopped (optional)
7. Baking can be a learning experience. Children and adults learn a lot together in the kitchen. The results of cooking or baking together contributes to stronger relationships at home and in groups and children learn time management, team skills, following directions and problem solving.

Valentine’s Day = Family/Friends Love/Celebration

Lorene Bartos
UNL Extension Educator

Valentine’s Day is around the corner. The stores have already stocked the shelves with Valentine’s candy, cards, decorations and flowers. This is a good time to think of ways to share love and caring with family and friends. Consider ways your family can celebrate together.

Some fun ways to show you care include:

- Make note cards or use post-it-notes to leave messages on

moraors, in lunches or other special places.

- For those with a sweet tooth make a candy bar wrapper with a special thought or message. Consider using the miniature bars.

- Plan a special time with each family member or special friend during the week of Valentine’s Day. It may be doing a special activity — baking, crafts, sports, going for ice cream or another treat or whatever that person likes to do.

- Make special treats such as Rice Krispie Bars in the shape of kisses, wrap them in foil and add a special message. This would be a nice idea for teachers, family members or co-workers.

- Make special foods on Valentine’s Day or when you celebrate. Foods in the shape of hearts — pancakes, cookies, cakes, sandwiches, pizza, jello jiggers, etc. Use a heart shaped cookie cutter to make the shapes easily.

- Make valentine’s to share with school mates, friends and family. Handmade items are always special.

Again I’m right in tune with the survey results. The AARP survey says 50% talk about morals and values; religion and spirituality; peer pressure or bullying; illegal drugs; and drinking and alcohol use. Dating or sex are topics for 37% of the grandparents. I have to laugh as I often start conversations with some of the grandkids with this question, “And are you making good choices?”

The data about frequency of communication, as well as topics, fits well with grandparent’s serving a role as mentor and teacher. We have a wonderful chance to help grandchildren by sharing our experiences and knowledge, all wrapped up in a big dose of love.

A personal aside — I always end my texts with Love, Gma.

How often do you communicate with your grandkids and what do you talk about?

Editor’s note from UNL Extension Educator Maureen Burson: “Science of Parenting” blog by Iowa State University Family Life specialists is one of the resources we recommend to parents participating in the Co-Parenting for Successful Kids class who request additional information about parenting. To subscribe, go to http://blogs.extension.iastate.edu/scienceofparenting.

Donna Donald
Iowa State University Extension
Family Life Specialist

I am the proud grandmother of seven young adults. They range in age from 14–24. Obviously they are well beyond the days of cuddling on my lap or arriving at the door with little suitcase in hand ready for a sleepover. As grandchildren grow up, it becomes a challenge as to how to keep connected. Fascinating information from a new AARP survey reveals more than 80% of grandparents speak to their grandchildren on the phone at least once a month. More than a third communicate via new technology — like Skype, Facebook, texting. So I started asking myself if I fit these results. I use Facebook for keeping up day-to-day. I text when I want a quick check-in. Phone calls follow if we need a longer conversation. And what do we talk about?

“Skype” is one way people can communicate on computer or mobile phones.

Keeping Connected with Grandchildren Helps Mentor, Teach and Love

Parenting App from UNL

Questions you have about taking care of your child are just a finger tip away. “U R Parent” is an app for iPhones, iPads, and Android phones which provides user-friendly information on parenting and child development. It is geared to the specific age of your baby’s age and your baby’s needs. Learn about:

- How your child is developing,
- How to care for your child and keep your child healthy,
- How to help your child learn and be happy!

The information is based on a team of pediatricians and researchers and educators and based on the latest research.

Receive your free newsletters by email — monthly for children 1 to 12 months of age, then every other month for children 1 to 5 years old. Just go to www.extension.org/parenting.

ASK LORENE

FAMILY LIVING TIPS

Lorene Bartos, UNL Extension Educator

Q: Why do high-efficiency (HE) washing machines suggest running a maintenance cycle?

A: Because HE washing machines use less water and the front-load models have an airtight seal, the maintenance of these machines is different than the top-loading ones you may be used to. Low wash temperatures may prevent some soils from completely rinsing out of the HE washing machines. Because only soils and some dirt-type soils are especially sensitive to lower wash temperatures, over time these soils may accumulate in the HE washer. This can lead to the growth of bacteria and mold, which can create odors in the HE washer. You can usually avoid these potential problems by using a maintenance cycle, which involves running a full wash cycle without any laundry in the machine. Ideally, this should be done once a week or, at minimum, once a month. Some HE washers have a special cycle. Check the user’s manual and follow its directions. If your machine doesn’t have a designated maintenance cycle, here’s what to do:

1. Select the hot water setting. If there isn’t one, then select a “white” or a “stain” cycle setting.

2. Select the “extra rinse” option, if offered.

3. Add liquid chlorine bleach to the bleach dispenser. Fill to its maximum level.

4. Run the cycle through its completion.

5. If the HE washer doesn’t have a second rinse option, manually select an additional rinse cycle to ensure no chlorine bleach remains in your washer.

If your HE washer still has unpleasant odors, repeat steps 1 through 5 as necessary.

Ask Lorene” by mail: Att. Lorene Bartos, UNL Extension in Lancaster County, 444 Chercreek Road, Suite A, Lincoln, NE 68529; email bartos1@unl.edu; or phone 402-441-7180.

Growing Onions from Seed

Sarah Browning UNL Extension Educator

Planting onions from small bulbs or “sets” is not the best way to grow large onions for storage. Plants grown from sets often begin blooming in mid-summer and stubbornly refuse to stop. Once that happens, onion bulbs don’t increase much in size.

Onion Sets

Onions are biennials. They grow foliage and a bulb the first season, then bloom and set seed in their second growing season. Growing the sets counts as one growing season, although it was definitely a short one, and the plants are primed to reproduce by setting flowers after you plant them in the garden. This makes onion sets a great way to grow green onions, but not the best way to grow onions for long-term storage. Because of onions biennial nature, plants grown from seed or transplants, don’t bloom the first year and can develop larger bulbs. Many mail-order companies and garden centers now carry onion transplants in spring, but you can also grow your own.

Growing Onion Transplants

Onion transplants can be grown in approximately 10 – 12 weeks. Sow seeds in late February or early March for planting outdoors in early May. Plant seeds 3/16 inch deep in a seed-starting soil blend and keep them evenly moist. Once they sprout, provide the seedlings with bright light from a sunny, south-facing window, or better yet, provide supplemental light with fluorescent fixtures placed a few inches above the growing area for 12 – 14 hours each day. Transplant the little, grass-like seedlings outdoors as soon as garden soil is dry enough to work thoroughly and daytime temperatures reach 50°F. Onion transplants will tolerate light frosts. Place them 4 inches apart in wide row plantings. When using “wide” rows plants are not placed single file in one long row, but spaced throughout a row ranging from 6 – 36 inches across. Use a row width convenient for you to reach from both sides, to make harvesting and weed control easier.

Direct Seeding

Onions can also be direct seeded. This is a good option if you can’t find your favorite cultivar as a transplant. Plant seeds as soon as the soil can be worked, usually from mid to late March. Wide row spacing also works well when planting onion seeds. Plant the seeds 1/4 – 1/2 inch deep in the soil. Space rows 12 – 18 inches apart. Once the plants have 5 – 10 leaves, they can be thinned so the remaining plants are spaced 3 – 4 inches apart and the harvested plants used as green onions.

Growing On

Onions grow best in well-drained soil, 6.0 – 6.5 pH, with a high level of organic matter. Raised beds, 4 – 6 inches high, work well to provide good soil drainage if the native soil is heavy. They also need plenty of sunlight, and regular watering. The installation of drip irrigation the length of the rows makes watering easier and more uniform.

Don’t be concerned if a large portion of the bulb develops above ground.

Commercial Pesticide Applicator Training

The Nebraska Nut Growers Association (NeNGA) & Heartland Nuts ’N More cooperative are sponsoring a Nut Orchard Extension seminar for farmers, both large and small growers in Nebraska. Black hundreds of farmers, both large and small, are growing nut crops in Nebraska. Black walnut, hickory, chestnut and butternut, and hazelnuts are beginning to increase in popularity. Growing an orchard can be a great project or income to the landowner.

Seedling Cost-Share Program

Current and prospective growers have an opportunity to participate in a growers’ 50 percent nut tree seedling cost-share program. This program is sponsored by the Nebraska Forest Service and Heartland Nuts ’N More, with technical support from NeNGA.

Growing Onions

Commercial/noncommercial applicators and examiners who apply restricted-use pesticides for hire or compensation, on property that is not owned or rented by themselves or their employer. Anyone who applies pesti- cides to the property of another person, either restricted- or general-use products, for control of pests in lawns, landscapes, buildings or homes must also have a commercial pesticide applicators license. Public employees (those employed by a town, county, state) applying mosquito control pesticides for hire or compensation must have a commercial or noncommercial applicator license. The program cost for both initial and recertification testing is $60/person. For those registering by mail, fax or at the door, the cost is $70/person.

In 2014, the UNL Extension in Lancaster County is offering training and testing in the following categories:

- general standards (00)
- agricultural pest control – plants (01)
- ornamental turf pest control (04)
- aquatic pest control (05)
- right-of-way pest control (07)
- structural/health related pest control (08)
- wood destroying organisms (08w)
- public health pest control (09)
- wood preservation (10)
- fumigation (11)
- wildlife damage control (14)

You may only participate in the general standards (00) and two category sessions on any training date.

Note: Due to time and space limitations, training will not be offered in all the categories on every day of training. Check the schedule listing when each category training will be offered.

Initial commercial certification training and testing sessions will be offered at the Lancaster Extension Education Center, 444 Cherrycreek Road, on the following dates:

- Tuesday, Feb. 4 (categories offered: 00-04-07-09-11-14)
- Thursday, Feb. 6 (categories offered: 00-01-04-07-08-08w-11)
- Thursday, April 10 (categories offered: 00-04)

The general standards session will begin at 8:30 a.m. and other categories at 1 p.m. or 3 p.m.

It is highly recommended you obtain and review the written study materials prior to attending. This will greatly improve your chances of passing the written examination. Study materials for all commercial categories may be purchased online at http://pested.unl.edu (click on “Classes & Study Materials”).

The Nebraska Department of Agriculture (NDA) is responsible for the certification and licensing of pesticide applicators in Nebraska. A commercial noncommercial applicator license is good for three years.

Initial and Recertification

To become licensed as a new commercial/noncommercial applicator, professionals must first pass a written examination. All participants must be tested in the general standards category, then each apply for seedling sets by applying to more specific categories for testing. Once licensed in a category, professionals can maintain their commercial certification by attending a recertifica- tion training session or by passing a written examination, with a few exceptions as explained below.

University of Nebraska–Lincoln Extension offers training to prepare those seeking a pesticide applicators license for the first time, and recertification for those needing to keep their license active. The program cost for both initial and recertifying participants who register online is $60/person; for those registering by mail, fax or at the door, the cost is $70/person.

Don’t be concerned if a large portion of the bulb develops above ground.
Appreciating Raptors

During the wintertime, bird-loving people fill their bird feeders to attract songbirds. But, hungry hawks will sometimes eat at the feeder, too. They won’t eat the seeds, but prey on the seed-eating birds.

We sometimes receive phone calls asking for advice about dealing with hawks hanging around or sitting high in trees above bird feeders. You cannot shoot or trap hawks and other raptors — both are illegal. Even if you think these birds of prey are “bad” birds, they are protected by federal wildlife laws and important in the balance of nature. It is also important to realize birds do not recognize rural and urban boundaries.

First, you might take a good look at your bird feeder and see whether it is placed near

natural sheltered areas like trees or shrubs. Evergreens are ideal harborage for songbirds — the thick foliage buffers winter winds and offers year-round hiding places from predators.

If you are greatly concerned about hawks, you may consider not filling the bird feeder for a few weeks or a month or so. The lack of food will force songbirds to go elsewhere, and the hawks will eventually abandon your area in favor of “better pickings.” If you hesitate to stop feeding the birds for fear they will starve, you can stop worrying. Studies have shown a backyard bird feeder only provides a small amount of the food birds eat each day. Most songbirds get the majority of their diet from natural food sources, even in the winter.

A second option is to continue feeding all the birds, with the eventual loss of a few songbirds. Rather than mourning the loss, remember, in the balance of nature, predation eliminates the weaker individuals, which strengthens the species population over time. Raptors rarely hunt hungry, strong and swift animals because it is too strenuous. Instead, they select the weak, the old, the young and the inattentive.

You may even get to witness the act of predation, which is an amazing act and the subject of television documentaries.

The successful hunting hawk at your feeder is an example of the survival of the fittest. According to the National Wildlife Federation, some raptors overwintering in eastern Nebraska include: northern harrier, sharp-shinned hawk, red-tailed hawk, rough-legged hawk, Cooper’s hawk, American kestrel and merlin. Bald eagles also overwinter in eastern Nebraska and are found along rivers and lakes.

Owls are Raptors Too

Most owls are nocturnal and will not usually prey on songbirds feeding at bird feeders. But, they could attack night-roosting birds.

Unlike most other birds, owls have large, front-facing eyes and excellent depth perception in low-light conditions. They have acute directional hearing. Owls are some of the quietest flying birds, swooping silently to snag unsuspecting prey with their sharp talons.

During the winter, owls primarily feed on small mammals, such as mice, voles and rabbits. Like hawks, they will kill domesticated poultry. Most susceptible are free-ranging poultry or poultry living in an uncovered pen. A headless bird carcass is the work of an owl.

To prevent predation by hawks and owls, it’s a good idea to either cover your bird feeder with screen bird netting or to house poultry at night.

All hawks and owls are protected under the 1918 Migratory Bird Treaty Act.

Providing Water for Birds

Many people who set up a bird feeder to watch songbirds in the winter don’t always recognize how important water is. In Nebraska, water is frozen during the coldest weather and unavailable to birds. You will greatly increase numbers of birds at your feeder by providing open water during the wintertime. Heated bird baths are available where bird feeders are sold. For more information about providing water for birds, check out www.birds.cornell.edu/AllAboutBirds/notes/BirdNotes09_ProvideWater.pdf
4-H Market Beef Weigh-In, Jan. 30
4-H and FFA exhibitors showing market steers or heifers at the Lancaster County Super Fair, Nebraska State Fair and/ or Ak-Sar Ben 4-H Stock Show must identify and weigh in their projects on Thursday, Jan. 30, 6–8 p.m. at the Lancaster Event Center Pavilion 2.

4-H’ers planning on exhibiting market beef at State Fair or Ak-Sar Ben must DNA sampled. There is a $6 per head charge. It is encouraged to have DNA pulled at the time of weigh-in. Exhibitors have until April 1 to identify, weigh and pull DNA on any market beef that may go to State Fair or Ak-Sar-Ben. Please note: all other market livestock possibly going to Nebraska State Fair or Ak-Sar-Ben will need to be DNA sampled, with a later due date to be announced.

4-H Crocheting Workshop, Feb. 8
4-H youth ages 10 and up are invited to learn how to crochet washcloths utilizing the single crochet stitch at the Basic Crocheting” workshop on Saturday, Feb. 8, 9 a.m.–3 p.m. at the Lancaster Extension Education Center, 444 Cherry Creek Road. No cost — all supplies will be provided. Adults are welcome to attend to help 4-H’ers. Must pre-register. Please call 402-441-7180.

If you previously attended this workshop, you are welcome to attend again as the 4-H’ers may enter washcloths at the Lancaster County Super Fair under 4-H Clothing — Level 1 Crochet.

Volunteers are needed to help lead 4-H clubs. If you would like to learn more about 4-H volunteer opportunities, call 402-441-7180.

4-H Photograph Themes
The 2014 4-H Photography Nebraska Theme classes are structured to encourage 4-H’ers to explore potential careers in photography.

Unit II, Pet photographer career exhibit print — Pet photographers know just how much pet owners love their animals and capturing pets in print is a great way to honor that relationship. Capture photos of your favorite pet and consider creative locations and whimsical props for your photo shoots.

Unit III, Editorial photographer career exhibit print — Editorial photographers take pictures that highlight the topics being written about in books, magazines, and newspapers. Editorial photos should be creative, powerful images that tell an intriguing story. Capture editorial photos that tell Nebraska’s story.

4-H Pillow Sewing Workshop, Feb. 22
4-H youth ages 8 and up are invited to learn beginning sewing skills and make a pillow at the “Pillow Party” sewing workshop on Saturday, Feb. 22, 9 a.m. at the Lancaster Extension Education Center, 444 Cherry Creek Road, Lincoln. No cost to attend. Adults are welcome to help.

Bring your sewing machine, basic sewing equipment (scissors, pins, measuring tape), etc. Also bring 1/3 yard and 2/3 yard contrasting fabrics, pre-washed, 100% cotton (no plaids, no knits) and matching thread. Pillow forms provided. Sign up by Feb. 19 by calling 402-441-7180.

4-H’ers may enter pillows at the Lancaster County Super Fair under 4-H Clothing - Sewing for Fun.

4-H Paws-On Dog Workshop, March 6
UNL Extension will present its annual statewide 4-H Paws-On Dog Workshop on Saturday, March 1, 9 a.m.–3 p.m. at the Greater Lincoln Obedience Club Building, 5740 Johannas Rd. This workshop aims to help 4-H members learn more about dog care and improve their 4-H dog training and showing skills. Topics include obedience, agility, showmanship and many other skills. Bring a crate and show leads to work with. Fee is $15 per person, which includes a lunch. Registration form will be available at http://compassional.unl.edu. Registration must be postmarked by March 1.

4-H Jammie Sewing Workshop, March 15
4-H youth ages 8 and up are invited to practice their basic sewing skills and make jammie bottoms at the “Jammie Jamboree” sewing workshop on Saturday, March 15, 9 a.m. at the Lancaster Extension Education Center, 444 Cherry creek Road, Lincoln. No cost to attend. Adults are encouraged to attend to help 4-H’ers. Bring your sewing machine, basic sewing equipment (scissors, pins, measuring tape, etc.), simple pull-on pajama bottom pattern, pre-washed flannel or 100% cotton fabric (no one-way design fabrics or plaids) elastic as recommended by pattern and matching thread. Also bring a sack lunch. Sign up before March 12 by calling 402-441-7180.

4-H’ers may enter jammie bottoms at the Lancaster County Super Fair and styled in Style Revue under Clothing Level 1.

Pick-A-Pig Club Accepting New Members
The Pick-A-Pig 4-H club will accept new members in February and March. All youth ages 8–18 are welcome. Learn all about raising a pig and showing it at county fair. The program is open to all central farm. Call Harry Muhlbach at 402-430-7304 with any questions.

4-H Horse Incentive Program Has Begun
Any Lancaster County 4-H’er can participate in the Lancaster County 4-H Horse Incentive Program and log hours/points by participating in various horse-related activities Jan. 1–June 30.

Starting this year, a belt buckle will be included as a gold-level reward option. However, due to the high cost, a buckle can only be chosen as an incentive reward one time by a 4-H’er and by seniors only. Horse Incentive Program guidelines and forms are available at the Extension office and online at http://lancaster.unl.edu/4h/horsenews.shtml.

State 4-H Horse Stampede Entries Due Jan. 31
The annual 4-H Horse Stampede will be held Saturday, March 1 at the UNL Animal Science Building on East Campus. Stampede includes the 4-H state horse-related competitions which do not require a horse: Horse Bowl, Public Speaking, Demonstration and Art Contest. Entries open to 4-H’ers ages 10–14 in the 4-H horse project (with the exception of the Art Contest). Any Lancaster County 4-H’ers may participate in the State 4-H Horse Stampede. Entry fees for Lancaster County 4-H’ers. Entry forms are due to the Extension office no later than Jan. 31.

The State 4-H Horse Stampede is structured to encourage 4-H’ers to attend and identify new 4-H Members Horsemanship Level Testing Dates
Now is a good time to start thinking about new 4-H horsemanship level goals! The 2014 group testing will be held at the Nebraska State Fair. Call Amy Countryman Arena on the following Tuesdays evenings: April 15, April 29, June 3, June 24 and July 1.
4-H Achievement Celebration

Tuesday, Feb. 11 • 6:30 p.m.
Lancaster Extension Education Center
444 Cherrycreek Road, Lincoln

Hayley Thramer, former Husker volleyball player and student coach, will speak about sportsmanship!

4-H members, clubs and volunteers receiving awards, scholarships or pins will be mailed detailed information.

Congratulations to all 4-H youth who commit themselves to excellence!

Light snack provided.

Discover, Learn and Grow at 4-H Summer Camps

2014 4-H Summer Camp brochures are now available online at http://4h.unl.edu/camp and at the Extension office. Camps are open to all youth ages 5–18 (need not be in 4-H). With locations at Gretna and Halsey, there are nearly 50 camps ranging from half day to seven days/six nights!

The 4-H camps and centers all meet over 300 standards established by the American Camping Association. It is the mission of Nebraska 4-H Camps and Centers to provide unique educational opportunities that empower people of all ages to be active in the pursuit of self-improvement in a safe, inclusive, and fun environment.

4-H Council Camp Scholarship

Lancaster County 4-H Council is offering two full scholarships to attend a 4-H summer camp at either of the two Nebraska 4-H Camp locations: Gretna or Halsey. Applicants must be 9 or older and currently enrolled in Lancaster County 4-H. Application deadline is May 1 — preference given to applications submitted by March 1. Applications are available at the extension office and at http://go.unl.edu/4cqy.

Applications Open for 4-H Camp Staff

The two 4-H Camps in Nebraska are currently accepting applications for summer staff. The camps offer outstanding opportunities for young adults to learn leadership skills, work with youth in outdoor settings, gain valuable experience for future careers, and make lasting memories. Need not be a 4-H to apply. Must complete Counselor Training at one of the sites:

- Summer Program Staff (ages 18 and above) — Seasonal, paid, full time staff who live at camp mid-May to August who are responsible for daily programming and teaching groups of all ages. Application deadline is May 1.
  - Junior/Senior Counselors (ages 15 and above) — Counselors who volunteer and select which weeks they can work throughout the summer. Provide valuable leadership to a group of campers by day and assist with cabin supervision at night. Application deadline is May 1.

For more information and applications online at http://4h.unl.edu/camp.

4-H Clubs Needed to Help Provide Booths at Kiwanis Karnival, April 12

The annual Kiwanis Karnival, a FREE family event, is sponsored by the Lincoln Center Kiwanis. This year, it will be held Saturday, April 12, 6–8 p.m. at Elliott Elementary School, 225 S. 25th St., Lincoln. The Karnival features carnival type games for the kids, bingo for adults, prizes, snacks, fun, and fellowship. Lincoln Center Kiwanis has sponsored this event for over 50 years — providing prizes and snacks. 4-H clubs are needed to provide carnival-type booths. This is a great community service and leadership activity for clubs. If your 4-H club or family would like to have a booth or for more information, call Lorene at 402-441-7180. Come join the fun!

Meet the Extension Board

The Lancaster County Extension Board serves as an advocate for UNL Extension in Lancaster County. Members of the board are appointed by the Lancaster County Board of Commissioners. The Extension Board provides guidance to Extension staff in establishing and accomplishing Extension education program goals and objectives. Annually, it assists in developing an operating budget and local educational priorities. The board meets monthly (usually the second Friday at 8 a.m.).

Outgoing Extension board member Wes Daberko (left) served two terms, including three years as president. Pictured with Extension Educator Gary Bergman (right).

Gardening at Lunch Webinar Series

Learn about various aspects of gardening from UNL Extension experts. Join us for an exciting “Gardening at Lunch” webinar series, right from your desk at work or home. During each program you can listen and interact with the speakers. You will need a computer with Internet access and sound to participate. Cost is $10 per program.

Must register for each program at http://marketplace.unl.edu/extension (click on Educational Programs). Registration will close one hour prior to the start of the webinar. For more information, contact Nicole Stoner at nstoner2@unl.edu or 402-223-1384.

Webinars are held Tuesdays, 12:05–12:55 p.m.

• Feb. 4: Small Fruits — Learn about Saskatoon berries, Honeyberries, Aronia berry, Elderberry, Cornelian cherry and bush cherries.
• March 4: For The Birds — Experience the sights and sounds of Southeast Nebraska birds along with Nebraska bird research results.
• April 1: 8 Steps to a Better Lawn — Learn the eight essential steps to manage or improve your existing lawn.
• May 6: Gardening for Pollinators — Learn all about pollinators and their benefits.

Earth Wellness Festival Needs Volunteers

Volunteers are needed for the 2014 Earth Wellness Festival on Wednesday, March 26 and Thursday, March 27 at Southeast Community College in Lincoln. Approximately 3,000 fifth-graders from 45 schools participate in this annual event which involves students in creative and innovative environmental education activities. This is the 20th anniversary of Earth Wellness Festival.

Each year, more than 175 volunteers take part in the festival activities as classroom escorts, presenter assistants, registration assistants and presenters. Volunteers are essential to the success of this event.

You may choose to volunteer one or both days. In return, you receive the opportunity to participate in a rewarding volunteer experience, a festival T-shirt, coffee, rolls and lunch. For more information, contact Tonya Bernadt at thbernadt5@unl.edu or 402-472-2712 by March 3. Visit http://lancaster.unl.edu/ewf to register online.

To kick off Earth Wellness Festival’s first festival in 1995, then City of Lincoln Mayor Mike Johanss read a proclamation and participated in a ribbon-cutting ceremony. 2014 will be the 20th anniversary of the festival.

NEBRASKA MASTER NATURALIST

The Nebraska Master Naturalist Program is an adult education program, focused on providing volunteers with hands-on experiences in Nebraska’s natural resources. Participants spend 60 hours with Nebraska’s finest educators, learning both in the classroom and in the field about topics such as Nebraska ecosystems, plants, animals, nature interpretation, conservation and more.

Upcoming trainings:
• Thursdays through Saturdays from April 3–26 or May 1–17 in Omaha and Lincoln (Fontenelle Forest, Glacier Creek Preserve, Spring Creek Prairie)
• Sunday through Saturday from June 8–14 at the Niobrara Valley Preserve near Ainsworth, Nebr.

Registration is $250 and discounts may be available. Apply today at http://naturalist.unl.edu or call 308-382-1820.
