This Article is brought to you for free and open access by the Great Plains Studies, Center for at DigitalCommons@University of Nebraska - Lincoln. It has been accepted for inclusion in Great Plains Research: A Journal of Natural and Social Sciences by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.

## INSTRUCTIONS TO AUTHORS

**Submissions.** All manuscripts should be concise: 5,000 words total including reference section. Tables and figures (including maps) should be carefully composed to achieve the author's goal of clarity of presentation. There is no limit for either figures or tables accompanying manuscript. Authors should, however, be judicious in their uses of figures and tables. All submissions should be typed double-spaced, including abstract, text, quotations, and bibliography, on 8.5 by 11-inch white bond paper with 1-inch margins. Informational footnotes are not accepted. Authors should submit three copies of their manuscripts to: **Editor, *Great Plains Research*, University of Nebraska–Lincoln, P.O. Box 880246, Lincoln, NE 68588-0246.** If the manuscript is accepted for publication, author/s will be asked to send the final document as an e-mail attachment or on a 3.5-inch high density IBM-compatible computer diskette or CD-R in a word processing or text file.

**Review Process.** All manuscripts are given double-blind review. Authors should prepare a separate title page with their name/s and affiliation, and any acknowledgments, which will not be sent to reviewers. The title of the paper should be repeated directly above the abstract. Authors should avoid self-identification in the text. When at least two external reviewers with expertise in the topic have submitted their evaluations, the manuscript is reviewed by the Editor who makes the final decision to publish.

**Article Style.** The Editor would prefer authors to write simply and in the first person. Authors should aim to communicate with a broad interdisciplinary audience in jargon-free language and should avoid sexist, racist, or otherwise biased language or intent.

**Title.** Article titles should not exceed 10 words (or 82 characters) and should not have subtitles.

**Main Headings** are centered: Introduction, Methods, Results, Discussion, Conclusions, Acknowledgments, References. If you have subheadings that should be left justified, please indicate those.

**Abstract.** A short abstract of less than 150 words should precede the main text. The abstract should identify the problem addressed in the paper, indicate the methodology, and summarize the results. Authors should prepare an abstract that will be interesting to and understood by nonspecialists in the field. Five to eight key words should accompany the abstract.

**Illustrations.** All illustrations including maps should be referenced parenthetically by arabic numbers in the text. For example, "Rainfall increases with elevation (Fig. 1)." Captions for each figure should be sent as a separate file and not included in the figure itself. All illustrations should be 4<sup>3</sup>/<sub>8</sub>" wide (no more than 7" tall) and sent as separate files as "grayscale" tiff or eps graphic files at 350 dpi; "line" illustrations at 1200 dpi. **DO NOT** embed graphic files into your article. **DO NOT** send figures as PowerPoint® graphics or Word docs.

**Measurements.** All measurements should be given in **SI units** (expanded metric system).

**Tables.** Tables should be presented on separate sheets apart from the text, printed as quality images. They should be formatted to fit the standard text area of the journal (4<sup>3</sup>/<sub>8</sub>" wide by 7.0" tall), since they may be treated as camera-ready illustrations at the time of publication. Send as a separate file with text file on diskette.

**Reference Style.** *Great Plains Research* uses *The Chicago Manual of Style*, 15th edition, as its reference guide. The journal uses author-date citations in the text [for example, in chronological order: (Smith et al. 1990; Templer 1992; Jones in press) and a complete reference section that gives author, year, title, source, and page references for journal or newspaper articles. **Include page numbers for quotations** [for example: (Templer 1992: 45)].

For a journal article:

Murkin, H.R. 1998. Freshwater functions and values of prairie wetlands. *Great Plains Research* 8:3-15.

For a book:

Blouet, B.W., and F.C. Luebke, eds. 1979. *The Great Plains: Environment and Culture*. Lincoln: University of Nebraska Press.

For an article in a book or conference volume:

Wedel, W.R. 1994. Coronado and Quivira. In *Spain and the Plains*, ed. R.H. Vigil, F.W. Kaye, and J.R. Wunder, 45-66. Niwot: University Press of Colorado.

---

For complete guidelines, please see our web page: <http://www.unl.edu/plains>  
Adherence to these guidelines will expedite the handling of your manuscript.
